## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-7, 9-28 and 58-77 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior of record fails to disclose the combination of a transistor structure recited in the base claims including the combination of the structure comprising: an implant region having a rounded corner between the portion of the substrate and the trench wall and the implant region having the same dopant type as the substrate type whereby the threshold voltage in the implant region is approximately equal to or greater than the threshold voltage on the portion of the substrate and whereby the pull back distance defines a width of the implant region which is approximately uniform around the process stack (claims 1, 6, 9, 15, 17, 58, 64, and 72); a dopant in the implant region thereby changing an electrical characteristic of the implant region and making a threshold voltage in the corner region about equivalent to or greater than a threshold voltage in a central area of the substrate underneath the oxide layer, the threshold voltage of the central area of the substrate being about substantially uniform (claims 24, 28, and 75).
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoai v. Pham whose telephone number is 571-272-1715. The examiner can normally be reached on M-F.
